## AED Warehouse Implements Autologue's ePaperless Office System

Thursday, July 05, 2007

**PORTLAND, OR** -- Autologue Computer Systems, Inc., recently implemented its new ecommerce product, ePaperless Office, at AED Warehouse in Portland, OR.

According to the company, ePaperless Office has had "a profound impact" at AED Warehouse. Mac Gritton, IT/operations manager of AED Warehouse, said the product has enabled AED customers to become more self-sufficient.

"They can retrieve the transaction information they need much quicker and easier on their own via eOffice. This saves time and money for everyone. Our employees also find, by using ePaperless Office, it is easier and faster to extract accounting information versus using our local computer system," said Gritton.

Through ePaperless Office, AED can view/print or fax invoices, statements and part numbers ordered, all via a secure Internet connection.
