**BUENA PARK, Calif.** -- Autologue Computer Systems Inc. has been selected as a recipient of the 2009 Frost & Sullivan Award for Industry Innovation & Advancement of the Year.

According to Frost & Sullivan, Autologue Computer Systems' focus on high-quality, low-cost technology solutions for the automotive aftermarket has had a significant impact on the industry. It paves the way for widespread technology usage and generates advancements in business efficiency.

The Frost & Sullivan Award for Industry Innovation & Advancement of the Year is bestowed each year upon a company that has proven to be a leader in the industry and that, through its pioneering technology, sound business strategy and research efforts, has been successful in moving the state of the industry forward. The award recognized excellence in the field that has extended beyond technical advancements and encompasses a comprehensive view of market participants, resulting in an ongoing improvement in the industry over time. This award recognizes companies for its broader, more comprehensive participation in the industry and for its contributions to the advancement of the market.
